- Black with blue borders
- Black with orange borders
- Black with yellow borders
- Black with red borders

## Anti-Fatigue Floor Mats

Reducing physical fatigue can lead to increased productivity. An essential, but often overlooked, part of your shop's layout plan is the floor surface. Working and standing on concrete floors for long periods of time can cause considerable strain and stress on feet, ankles, calves and knees. That's why these anti-fatigue mats are a must.

### Features

- The super resilient, sponge-based Nitricell™ rubber and PVC helps reduce physical fatigue on the lower extremities so your technicians can concentrate on the task at hand.
- The vinyl diamond-plated surface resists fluid spills and provides constant traction.
- Tapered edges prevent tripping hazards and allow service carts to easily roll over the mats.

15/16" Thick
